

LIVE IT UP—THERE'S AN **APACHE**® FOR YOU!

Even the Mrs. can put up
an **APACHE**[®]

Doesn't seem possible but it's true. It's so beautifully balanced that she can easily move it around and she can put it up in a matter of minutes. Don't take our word for it. Visit an Apache Camping Center and see for yourself.

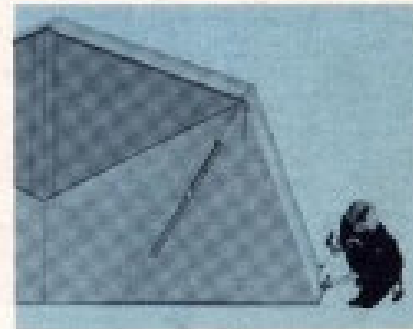

Polymer Travel Cover is removed, bow system is raised and tent begins to take shape.

One person easily positions tent.

Extending telescopic bow system gives rigidity—easy to set up.

Stake-out puts on finishing touch.

VESELY MANUFACTURING CO., LAPEER, MICHIGAN, is the home of Apache Camping Trailers. It is the largest and most modern camping trailer plant in the world. Come be our guest and see how an Apache is made. One guided tour each day—Tuesday through Friday—starts at 2 P.M.—no later—no other tours during day.

All units sold by the Vesely Manufacturing Company are warranted. The customer is furnished a warranty card, parts list and set of instructions on the care and use of his Apache when the unit is purchased.

Prices listed in this brochure are suggested retail prices in the United States, F.O.B. Lapeer, Michigan. Prices slightly higher in Canada and abroad.

We reserve the right to make changes at any time, without notice, in price, color, materials, equipment, specifications, models, and also to discontinue models or to make changes without obligation regarding previous models.

VESELY MANUFACTURING COMPANY, BOX 151, LAPEER, MICHIGAN.

"Last call . . . everybody ready? Boys! Got your bathing suits? . . . fishing tackle? . . . been to the bathroom?" The start of a vacation has a special thrill. The things you've dreamed about all winter, the plans the kids made that they're talking about right now. The gas tank is full and you're pulling out of the driveway. The neighbors call—"Drive carefully,"—"Have a good time." You make a last mental check—the paper, milkman, postman, light on in the kitchen, and you all wave one last goodbye. What lies ahead? You don't know exactly . . . and that's part of the fun. As we look back to early Apache owners, hundreds of families come to mind—warm, friendly people that we still correspond with. A lot of them tell us why they like their particular Apache model. In the following pages we've tried to bunch these reasons together under each model and we've picked a make-believe family for each—who after all are composites of real people.

EVER FOR...THERE'S AN APACHE FOR YOU!

The Petersens like the

APACHE

'525

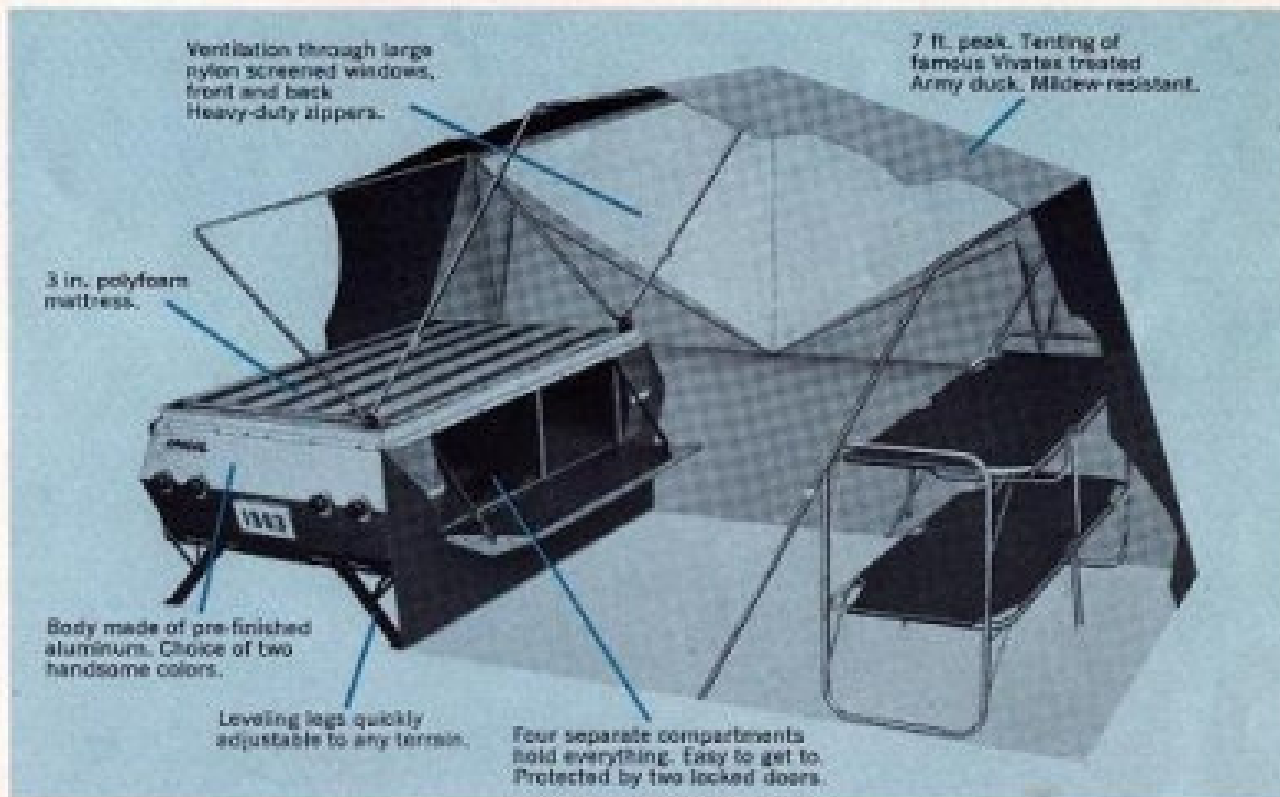

7'0" x 5' LAPSEL HOUS

CHIEF

The quality of the Apache Chief appeals to a lot of people. It's the world's most popular on-the-ground camping trailer. Here are some reasons why the Petersens bought it: 80 square feet of living space plus plenty of storage—45 cubic feet. And sleep comes easily in the permanent, full-size double bed. Sewn-in floor for snug protection against drips and drafts. Large screened windows allow plenty of ventilation.

Closed—It's a sleek, compact trailer with a stylish travel cover made of ABS High Impact Polymer.

Ventilation through large nylon screened windows, front and back. Heavy-duty zippers.

7 ft. peak. Tenting of famous Vivatex treated Army duck. Mildew-resistant.

3 in. polyfoam mattress.

Body made of pre-finished aluminum. Choice of two handsome colors.

Leveling legs quickly adjustable to any terrain.

Four separate compartments hold everything. Easy to get to. Protected by two locked doors.

WHATEVER TYPE OF VACATION YOU HANK

Why the Kellys picked the

APACHE

'645

F.O.B. LARSEN, NICH.

EAGLE

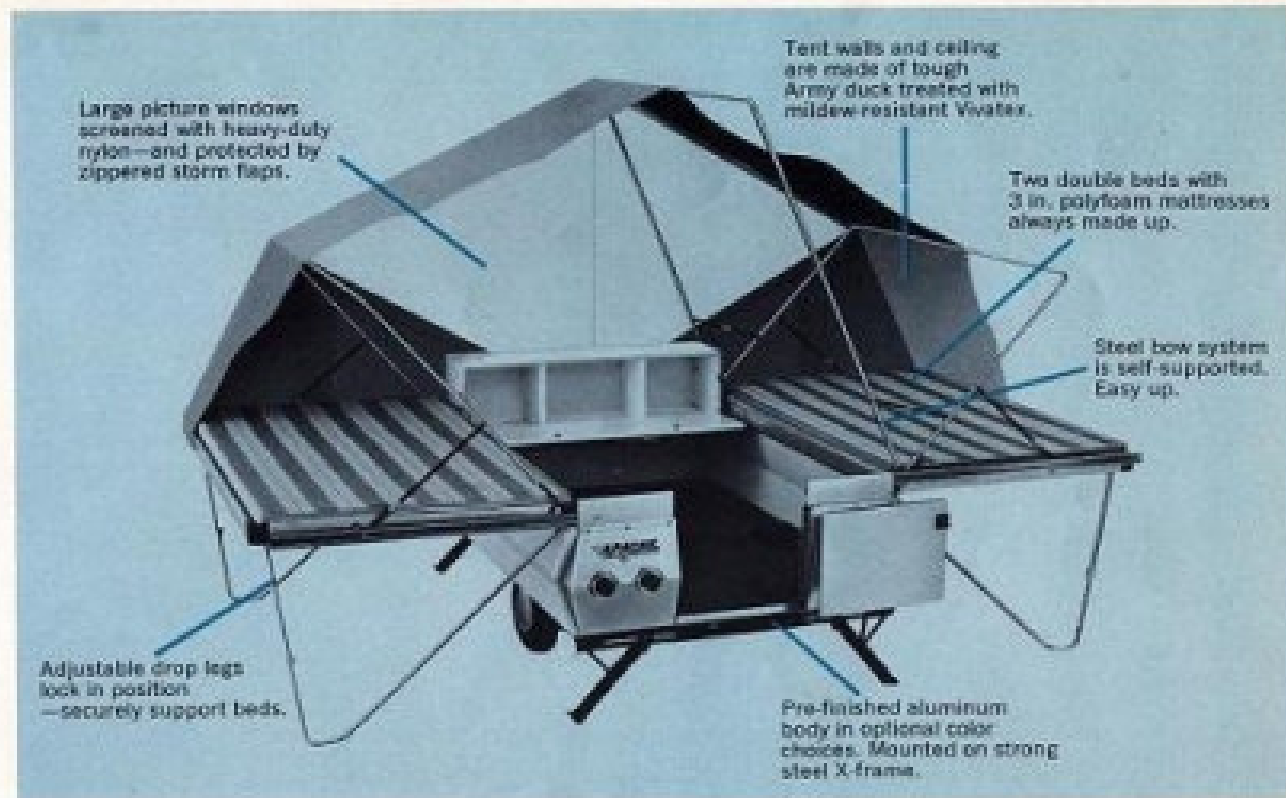

First, because the Eagle has snoozing facilities for the four Kellys. Mother liked the beds permanently made up . . . and the mattresses of 3" polyfoam invited sleep. They liked the screened area, front and back, which provides plenty of light, cross ventilation, and keeps out mosquitoes. They found there was enough storage space for belongings of the whole family. Dad was impressed with the quality. Said it must have been built by craftsmen . . . it was.

Large three-way divided storage compartment raises to convenient position and provides handy work space.

Trailer floor provides large storage area when trailer is closed for traveling; floor covering is heavy vinyl-coated rubber carpeting.

SPECIFICATIONS

TRAILER BODY & CHASSIS

Body Length—91", Width—68" • Pre-Finished Aluminum—Optional Colors —Hunter Red or Vivid Cream • Steel X-Frame • Solid Steel Axle • Hi-Speed Timken Tapered Roller Bearings • Two 4 Leaf Springs • 4.80/4.00 x 8" 4 Ply Tube-Type Tires (Hi-Speed) • Removable Steel Tongue • Quick Coupling Hitch • Rigid Double Panel Rear Door • 4 Quick Adjust-A-Level Legs • Auxiliary Safety Chains • Demountable 4 Lug Wheels • Directional Signals, Stoplights & Tailights • 1/2" Plywood Bottom Com-

The Alisons are having a ball with their

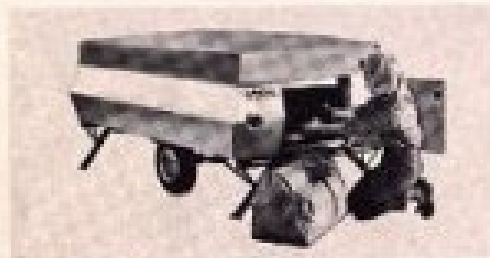

APACHE®

1450

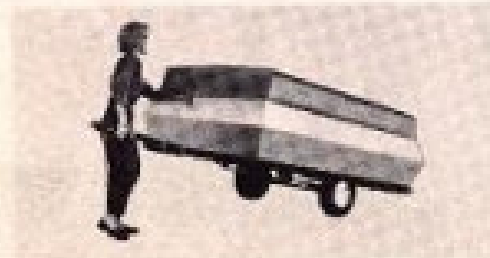

FOR LAPERS, HIGH

RAVEN

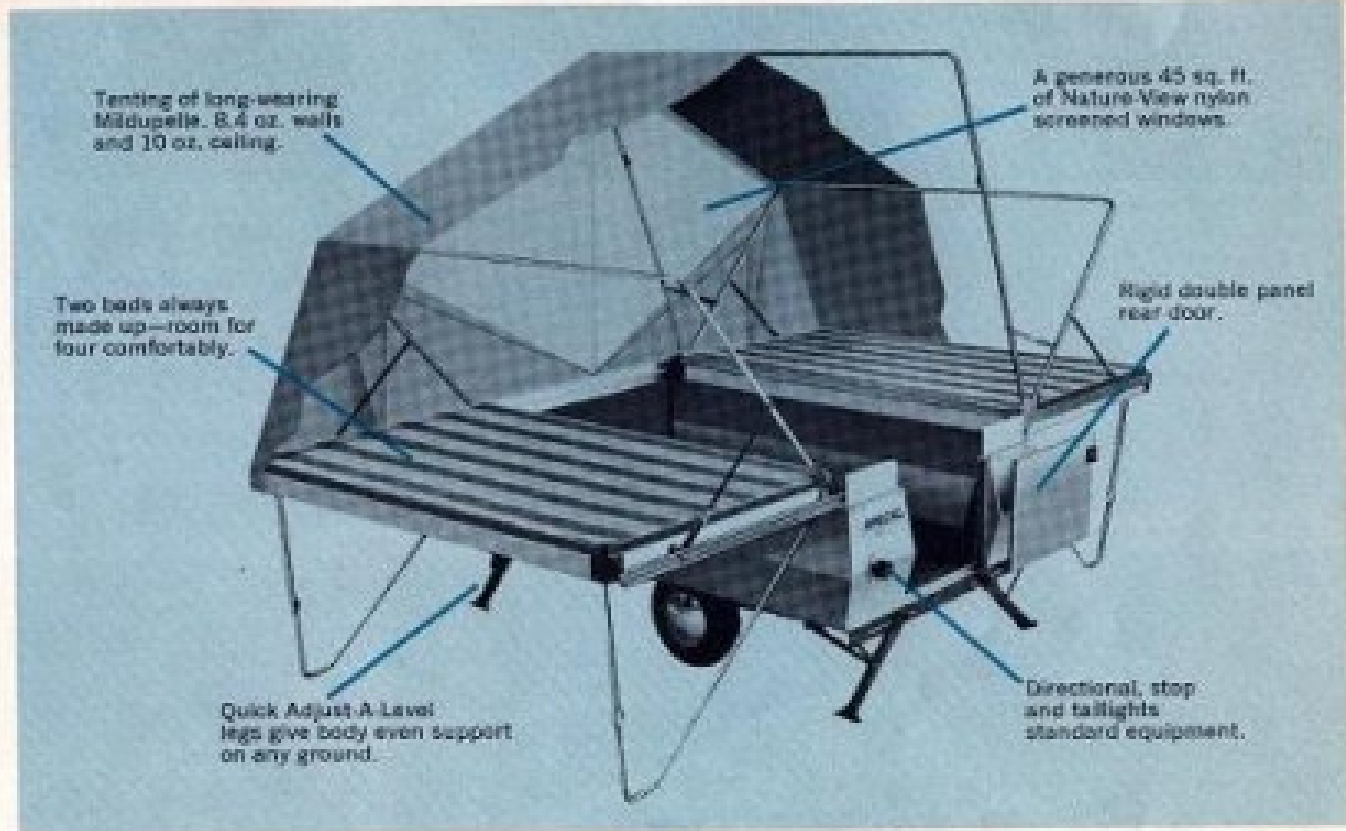

They're sure glad they bought the Raven. The husband—an engineer—couldn't get over how well balanced it was. Said it rode "light as a feather. Had to turn around to see that it was there." Has a high speed undercarriage. He was amazed at the quality engineered into the Raven. Reminded him of the high-priced cars he works on. There are four Alisons and the Raven sleeps four—comfortably. Loads of load space, too. They think there's none better than the Raven for the money.

Enough storage space for any family and that's saying plenty.

No chivalry here . . . but a gal can lift it, easily.

SPECIFICATIONS

Look who picked the

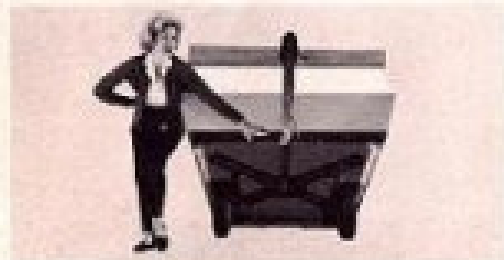

'395
FOUR LAFER, MICH. **SCOUT**

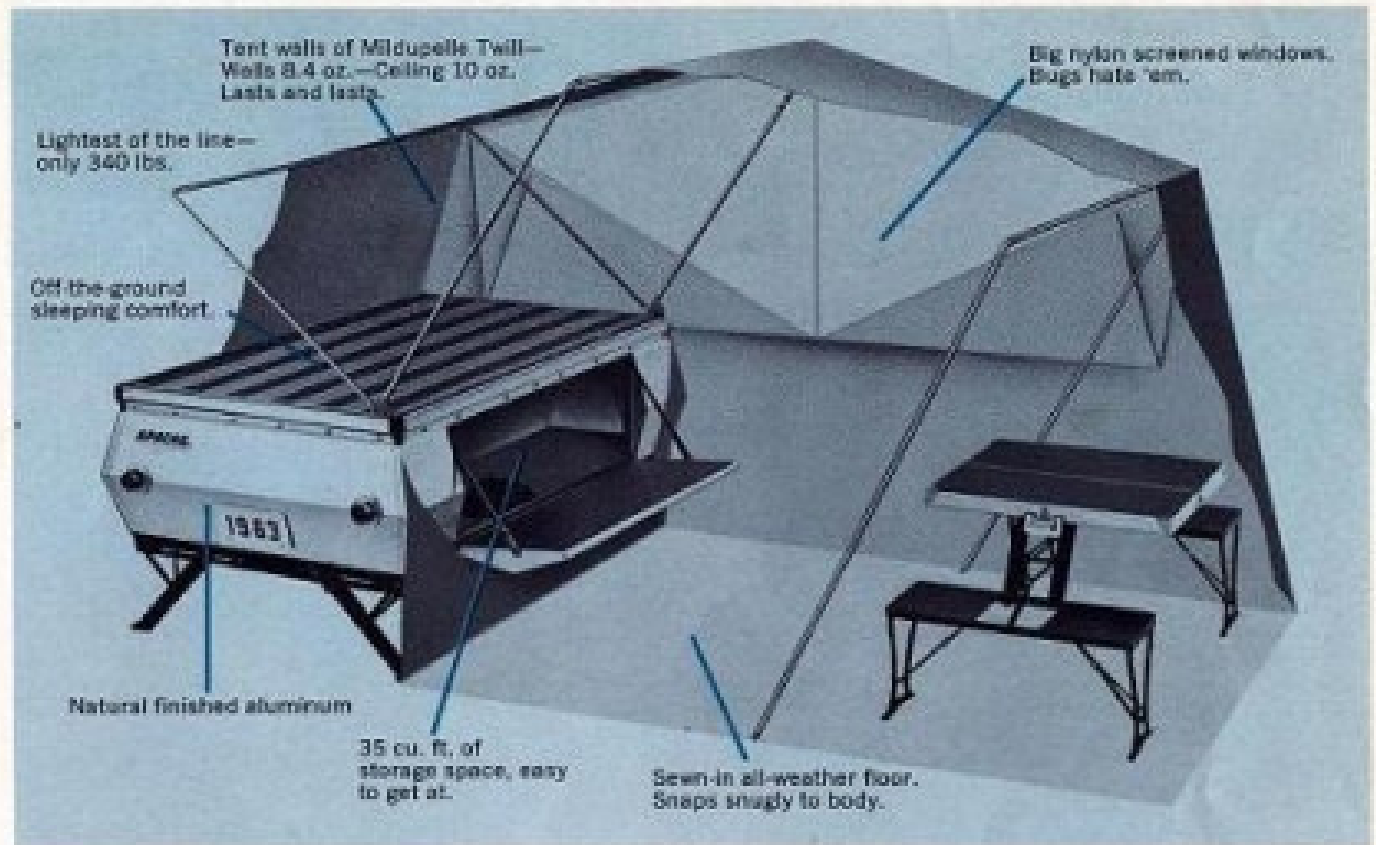

A family of four—the Schneiders. They just added a double-decker cot for the kids. You've got to see the Apache Scout to believe just how much room there is for such a small investment, and get a first-hand impression of its quality and craftsmanship. Gives a family on a budget a chance for some wonderful vacations they'd never have otherwise. All these are standard features—two big storage compartments—draft-free sewn-in floor and permanent double bed.

Large storage compartments on both sides of trailer. Door lets down to provide additional handy working area.

Handsome streamlined body mounted on rugged new X-frame and high speed undercarriage.

Tent walls of Mildupelle Twill—Walls 8.4 oz.—Ceiling 10 oz. Leaks and leaks.

Big nylon screened windows. Bugs hate 'em.

Lightest of the line—only 340 lbs.

Off-the-ground sleeping comfort.

Natural finished aluminum

35 cu. ft. of storage space, easy to get at.

Sewn-in all-weather floor. Snaps snugly to body.

While other campers are still pounding stakes . . .

Apache Camper Trailer

you can be broiling yours!

Want a camp that's neat up, easy down, a real people pleaser, with enough space to store your gear and enough room to lounge a little? Want a retreat!

An Apache Camper assembles in a matter of minutes (over 400 of them). Burgers to nearly 80 sq. feet of living room (more than that with optional Add-A-Room add-on). The master bed is a built-in double with iron mattress. For gear, there's 100 cu. feet of storage. There's space to load and boot a slew of items.

The Apache trailer body is made of lightweight aluminum. Prefinished so it won't rust or corrode. Tented in Kevlar-coated Army duck (unlike canvas . . . won't let the horses in!)

Last year, Apache off-the-ground and on-the-ground campers from the \$395 Scout to the \$645 Eagle, were the best selling camping trailers in America. And we've improved them since then. Take your next trip in an Apache!

APACHE®

CAMPING TRAILERS

Vesely Manufacturing Company, Box 151, Lapeer, Michigan
WORLD'S LARGEST MANUFACTURER OF ALUMINUM CAMPING TRAILERS

Apache Chief, 3005 F.O.B., Lapeer, Michigan

How does this stack up

It's a poor camp that looks like Fibber McGee's closet on wheels. What to do, what to do?

Eureka . . . a new Apache Chief!!!

The Chief goes up in a hurry (you'll be reluctant to take it down). There's plenty of room for cargo. Plenty of space for walking around. There's a built-in double bed and foam mattress for people who take their sleep seriously. Two big picture windows (45-sq. feet of them) with zippered storm flaps and built-in nylon screens are part of the deal.

An Apache follows at normal highway speeds (you know it's there, you snapped on the hitch). In camp, moving an Apache

against the camp you're toting now?

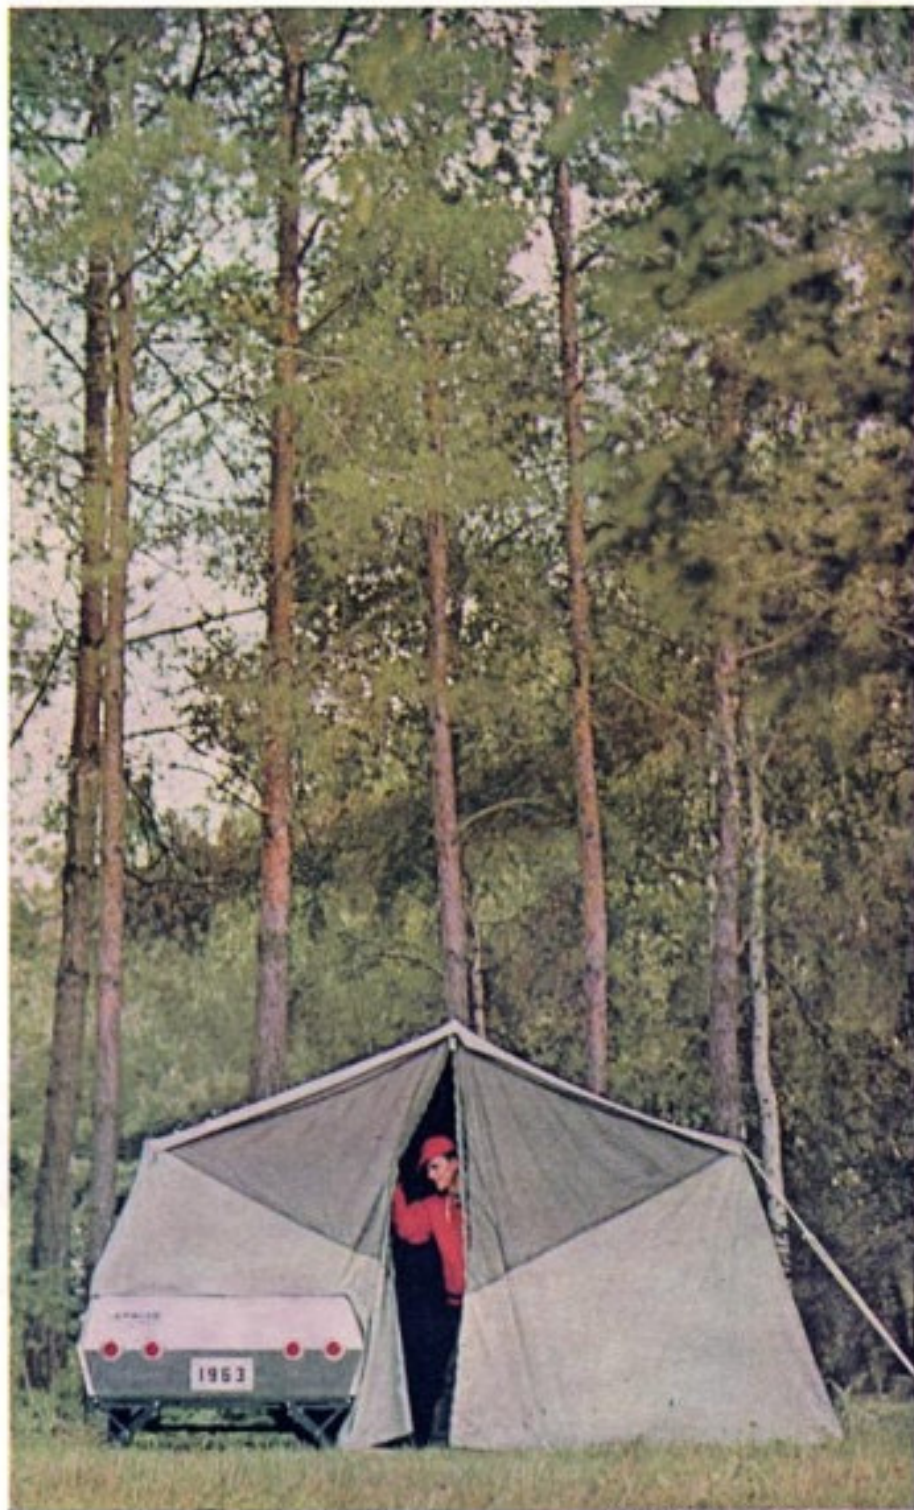

is a one-man job. Aluminum makes it light, and rust resistant. Time to break camp? About 8 minutes!

You can finance a new Apache through your dealer in less time than that. An on-the-ground or off-the-ground Apache, from \$395 Scout to \$645 Eagle. Finance two if you'd like.

Take your next trip in an Apache!

Send your name and address to Vesely Manufacturing Company, Dept. CG-4, Lapeer, Michigan, for the name of your nearest Apache Camping Center and a copy of the free 1963 Apache brochure. **APACHE** World's largest-selling camping trailer

Apache Chief, 3025 F.O.B., Lapeer, Michigan

**"You put on the coffee
while I put up the Apache . . ."**

"Coffee ready yet?"

Want to see something fast? Watch this . . .

An Apache Chief is up even before you add the chicory (takes about 8 minutes). With built-in double bed and foam mattress. Over 45 cu. feet of storage. Two big picture windows with nylon screening and zippered storm flaps. Draft-free, sewn-in flooring. Vivatex-treated Army duck tenting! . . . How's that for speed?

With an Apache in tow, you cruise at normal highway speeds (bon voyage). Lightweight aluminum makes it easy to move, hard to rust. There are on-the-ground Apaches and off-the-ground Apaches, from \$395 Scout to \$645 Eagle. They're the fastest-up, fastest-down, fastest selling camping trailers you ever saw. Your Apache dealer will help you finance one in a minute or two!

. . . Take yours black, or with cream and sugar?
